Profile

Dynamic and performance focused Front End Developer with comprehensive experience managing the design, development and implementation of systems and applications, from concept through delivery. Articulate communicator, proficient in all phases of the application development lifecycle with ability to gather and translate business requirements into technical solutions and produce high-quality, user-friendly, and secure products. Proven record of success leading a team of developers throughout all phases of the development, strategically allocating resources and delegating tasks to achieve on-time, on-budget delivery. Proficient in fast-paced and dynamic environment. Expert in developing scalable solutions that dramatically improve productivity, fuelling competitive advantage and revenue growth. Well versed in advanced development methodologies, tools and processes.

Expertise and Skillset

• HTML / HTML5	• React	• User Research	• Innovative
• CSS /CSS3	• Nodejs	• Product Management	• Leadership
• Bootstrap	• Rest API	• UX Design	• Product Strategy
• Java Script	• MongoDB	• Critical Thinking	• Excellent Communication
• jQuery	• XML	• Team player	• Problem Solving
• Angular JS	• Git	• Time management	• Front End Web Development

Educational Qualifications

T.U. Dublin, M. Sc. Computing (Advanced Software Development) August 2018 to September 2019

Subjects: Fundamentals of Computer Science Web Technologies, User Experience Design, Software Design, Systems Architectures, Problem Solving, Communication and Innovation, Secure Systems Development, Programming Paradigms, Research Writing and Scientific Literature, Research Methods and Proposal Writing

- Developed a responsive MEAN stack application for hotels of Europe with the REST API.
- Dissertation on measuring the mental workload on JavaScript events.

Professional Experience

Jivox, India — *Team Lead* — July 2016 to August 2018

Developed and led front-end applications on agile development encompassing, requirement gathering and analyzing needs, scoping requirements and estimation, providing strategic and tactical direction to a team of 5 front end developers, and developing base-line staff assignment to deliver high quality, user-friendly products.

- Improved project on-time delivery rates by articulating the application development efforts from project conception to delivery and implementation, consistently inspiring team members to produce their best.
- Boosted usability of products features by translating UX prototypes into usable interfaces aligning with business goals and monitoring continuous improvement in all phases of application development to meet best practices of the product.
- Minimized the amount of returns by validating designs through directing team meetings to check on progress and plan direction as well conducting QA testing to ensure the design and vision of the product features were achieved.

- Achieved quick results in productivity and accuracy of process through developing technology roadmap for MEAN stack development and identifying challenges, timelines, and solutions in order to deliver high performance products to clients.
- Streamlined web advertisement efficiencies with best practice of ad template by developing an ad test automation environment for troubleshooting a solution for 60 different websites without impacting the existing website styles.

Jivox, India — *Widget Engineer* — **July 2014 to July 2016**

Developed several widgets, advertisement & software applications from design and prototyping through implementation and delivery, consistently translating user requirements into usable interfaces aligning with business goals.

- Maximized product efficiency through deftly designing, developing and implementing custom widgets using front end frameworks with focus on optimizing the functions and value of products.
- Increased demand for products and services by efficiently building and developing SPA based application on responsive and adaptive web solutions, including providing design solutions and specifications using node, angular and bootstrap.
- Drove major and significant stability and performance improvements through identifying key areas of improvement and conceptualizing and developing application using React & Bootstrap.
- Championed and delivered web apps solutions for leading USA automotive and cosmetics companies by developing innovative solutions to improve customer experience and core business processes.
- Design, developing and maintain WebRTC stack and track video metrics using JavaScript.

Exilant Technologies — *Associate Developer* — **Aug 2012 to July 2014**

Responsible for the analysis, design, development and testing of applications, to include providing technical leadership and expertise for application development from inception through delivery.

- Raised product quality by expertly coding user interface using HTML5, JS, JSP, jQuery and CSS3 and applying creative solutions that utilized easy-to-use flows, visual designs and user-friendly experiences.
- Enhanced overall quality of the development process and improved customer satisfaction through coordinating with the UX team to ensure that all development issues were fixed timely.
- Maximized the efficiency and effectiveness of the overall development cycle through optimizing the application for maximum speed and scalability for various business operations.
- Improved user experience and satisfaction by researching and creating competitive layouts with common UX patterns and UI designs that were easily accessible and logical, under extremely tight deadlines in a collaborative development environment.

Other experience

Bidvest Noonan, Dublin, Ireland — *Part Time Security Officer* — **July 2019 to Present**
- Taught and mentored students on table tennis and Organised various tournaments.

Interests and Achievements

Awards:	Awarded as **'Jivox Above and Beyond'** in November 2016.
	Awarded as **'MVP of Jivox'** in November 2018.
	Secured **'7.5 out of 9 bands'** in **IELTS** held in October 2019
Interests:	Reading Books, Watching Football, Playing Table Tennis & Travelling
